Chapter 9, Solution 63.

First, replace the wye composed of the 20-ohm, 10-ohm, and j15-ohm impedances with the corresponding delta.

$$z_1 = \frac{200 + j150 + j300}{10} = 20 + j45$$

$$z_2 = \frac{200 + j450}{j15} = 30 - j13.333, z_3 = \frac{200 + j450}{20} = 10 + j22.5$$

Now all we need to do is to combine impedances.

$$\begin{split} z_2 & \Big\| (10 - \mathrm{j}16) = \frac{(30 - \mathrm{j}13.333)(10 - \mathrm{j}16)}{40 - \mathrm{j}29.33} = 8.721 - \mathrm{j}8.938 \\ z_3 & \Big\| (10 - \mathrm{j}16) = 21.70 - \mathrm{j}3.821 \\ Z_T &= 8 - \mathrm{j}12 + z_1 \Big\| (8.721 - \mathrm{j}8.938 + 21.7 - \mathrm{j}3.821) = \underline{34.69} - \mathrm{j}6.93\Omega \end{split}$$
